Applications are invited towards the filling of the following position:

### SYSTEM ADMINISTRATOR: UNIX OPERATING SYSTEM ICT & CBS-IT INFRASTRUCTURE

#### Purpose of the Position:

To do installations, administer, maintain and provide user support of corporate systems running on Unix PLATFORM. This entails continuous involvement with and monitoring of those systems, maintaining updates of systems software, the implementation of procedures and operational standards that will ensure operational control, and the implementation and maintenance of Back-ups and DRP (Disaster Recovery Plan). To administer, control and adjust the total IT systems platform responsible for running e.g. within the Telecom Namibia's Information Technology Infrastructure. consisting of a total integrated operating systems platform of interrelated specific operating systems on which applications are based i.t.o. operational integrity, functionality and security, and to ensure that at operating and database level all functional requirements are operating to specification. To liaise closely with the various primary users within Telecom Namibia as an organisation. To administer, maintain, monitor, support, document, and assist in the implementation of the Company's various storage requirements on the Storage AREA Network (SAN). The technology includes; the SAN and the HP (Hewlett Packard) Enterprise Virtual Array.

#### Key Performance Areas will, amongst others, include the following:

- Unix System Administration Plans/Efficiencies & Procedures
- Unix System Update Services, Systems Maintenance Services/Applications
- Unix Systems Maintenance Services/Database.
- User Support Services, Systems Security/Integrity Management and Statistics, Reports & Advice.
- Facilities Implementation and Self-Development for enhancing the broader knowledge.

#### Educational qualifications & experience required:

Typically a graduate in Computer Science or a 3 year National Diploma in IT, linked with substantial experience in Unix Operating System Administration and Database Management. Typically the incumbent will have around 3 years of substantial experience in UNIX (Linux and Solaris) operating systems Administration and Database Management (MySQL). Analytical and systematic thinker. Good practical problem solving abilities. Logical and methodical in approach. Attentive to detail, and able to communicate along technical lines. Flexible in the generation of solutions and able to balance various often conflicting considerations. Can communicate reasonably well with people and is service oriented. Diligent and Conscientious.

#### Characteristics:

Self-motivated, adaptable, and with high stress tolerance. Able to manage a variety of tasks at a same time. Fluency in official language. Namibian citizenship. High energy level. High sense of responsibility. Trustworthy, ability to work in a team and to think independently. Attentive to detail, with good problem solving abilities. Good interpersonal and communication abilities as well as supportive in approach.
